

Data Design System ASA - Third quarter 2011

About the company:

Data Design System (DDS) is an independent developer organization of innovative and highly advanced CAD/BIM software solutions for the building industry.

The company's flag-ship product is DDS-CAD MEP (Mechanical, Electrical and Plumbing) which is a **BIM authoring tool for MEP** with **integrated calculations** and interdisciplinary coordination. The design functions does not only cover the MEP disciplines, but are also **integrated with Architectural BIM models using OpenBIM and buildingSMART standards** for interoperability.

The other product line is **DDS-CAD Architect & Construction** which is highly specialized to handle typical Scandinavian style residential units. This including Timber Frame, precut, prefab elements and other industrialized production methods including interfaces to production lines. All activities related to this product is handled by the 100% owned daughter company, DDS Building Innovation AS.

The company is proud of its' products and services being recognized by many as **"best-of-breed"**. With more than 25,000 daily users world-wide, Data Design System is one of Europe's leading construction software developers.

The mother company is located outside Stavanger (Norway). DDS has established subsidiaries and sales offices in Germany, Austria and the Netherlands. In addition DDS has distributors in several other countries. Visitation address: Øksnevad Næringspark, N-4353 Klepp Stasjon, Norway. Homepage: <http://www.dds-cad.com/>
